Carta, NYC

Senior Software Engineer II (Staff Equivalent)

November 2022 - Present

- Led a team working on a new homepage for the Fund Admin business, an interactive visual accounting page to simplify Fund Admin management for GPs.
- Led the frontend implementation of a new Tax Dashboard for Venture Capital GPs, leading to increased conversions totaling over \$5 Million in YoY profit and delivering tax returns over 50% sooner than the prior year
- Spearheaded an improved data collection process for the Tax Dashboard, improving user CSAT metrics 50%. Worked closely with key stakeholders to define requirements and the project roadmap while mentoring a junior engineer throughout the project, helping him earn a promotion quickly
- Developed and rolled out a unified analytics library, enabling consistent product insights across teams; adopted by 85% of engineering org within 2 months.
- Chaired engineering-wide documentation initiative, reducing onboarding time by 30% and improving internal developer satisfaction (measured via Google survey).

Capsule Pharmacy, NYC

Technical Lead - Retention Team

Senior Engineer - Full Stack, Consumer Teams

December 2019 - November 2022

- Worked closely with Eng Management and Product to coordinate our team's roadmap each quarter, balancing product priorities, tech debt, and capacity. Achieved over 95% roadmap completion each quarter
- Instituted agile ceremonies doubling sprint velocity and improving team happiness
- Mentored junior teammates, helping one grow to Senior within one year
- Project lead for the Capsule internal credit/debit accounting micro-service. This project led to over 5,000 new customer sign ups with 85% conversion rate
- Conceived of and led the development of a new template engine application (Django) and introduced a new frontend (NextJS & React) that significantly improved user experience and brought app incidents from 3 to 0 per quarter
- Devised and coordinated the development of a new consumer BFF application as part of Capsule's move to micro-service architecture, including domain-service architecture, custom error handling, comprehensive test coverage and proactive alerting

Invitae, NYC

Senior Software Engineer

November 2018 - December 2019

- Led a project, working with product, science, and design, to bring NIPS testing in house, saving the company \$2 million per month
